

Zirax up-grades ICEMELT plant in Volgograd by 40%

Zirax is announcing completion of up-grading of its Volgograd ICEMELT plant by 40%. The up-grade has been done following the increased demand for high performance de-icing products from Russia and international side by both municipal and private consumers, as well as from retail sector.

The up-grade has also made possible for Zirax to produce more variety of de-icing products with flexibility to service various customers with different product receipts, reduce storage costs and provide for in-time delivery of products for the end-users before the season to ensure safe stocking of ICEMELT products for each customer at the beginning of winter maintenance season.
